

Ayooluwa Oyebade

Computer Engineer & Creative Developer

Ile-Ife / Osun, Nigeria · <https://ao-oyebade.vercel.app> · <https://github.com/Ayosensei>

Email: ayosensei22@gmail.com

PROFILE

Computer Engineering student (OAU '27) and Creative Developer with a 5-year track record of building high-performance digital products. I bridge the gap between low-level technical precision and high-level artistic direction, specialising in frontend architecture and immersive UI/UX that scales.

EXPERIENCE

Technical Lead & Lead Web Developer | OAU Law Reports

2022 – Present

- Spearheaded the full-stack development of the official law review platform using Next.js, TypeScript, and MongoDB.
- Manage complex digital infrastructure and SEO strategy, ensuring high accessibility for legal archives and editorial board assets.
- Serve as the primary technical advisor, bridging the gap between legal requirements and digital implementation.
- Optimised server-side rendering and database queries to handle large-scale legal archives, ensuring sub-second page loads for critical research documents.
- Implemented automated backup and deployment workflows via Vercel and GitHub Actions, increasing the platform's uptime and reliability.

Lead Creative Developer | For Better Days

2025 – Present

- Led a professional community of Web3-skilled individuals, facilitating job hunting and collaborative project development.
- Architected and deployed the community's digital hub, focusing on a high-performance frontend and seamless user experience.
- Lead UI/UX design and brand strategy to establish a distinct visual identity for the community's mission.

Lead Creative Developer & UI/UX Designer | Freelance & Remote

2020 – Present

- Architect high-performance web applications and brand identities for diverse clients across Nigeria and remotely.
 - Deliver scalable, user-centric solutions using Next.js, React, and modern design systems.
 - Handle end-to-end product lifecycle: discovery, design (Figma/Canva), development, and deployment.
-

EDUCATION

BSc Computer Engineering

Obafemi Awolowo University, Ile-Ife

2023 – 2027 (Expected)

Specialising in embedded systems, digital logic design, and software architecture. Building a strong foundation in both hardware and software integration.

SELECTED PROJECTS

CloverBoys | Creative Development & Web3

URL: <https://cloverboys.vercel.app>

- Architected a high-performance web platform utilising Next.js and TypeScript to facilitate early pattern recognition and community-driven Web3 engagement.
- Engineered immersive visual experiences using Framer Motion for complex scroll-driven animations and Canvas for dynamic, interactive background effects.
- Designed a luxury-themed brand identity and UI system using refined typography and colour palette to establish market positioning.

SIGNAL | Interactive Game Engineering

URL: <https://signal-cloverboys.vercel.app/>

- Engineered a high-performance, dark-themed match-3 web game using React and Vite.
- Developed a recursive match-and-cascade system to handle complex 8x8 grid patterns and satisfying gameplay loops.
- Architected a custom multi-input interaction system that supports desktop drag-and-drop, traditional clicks, and native mobile swipe gestures.
- Optimised game performance and state management to ensure a fluid experience across all device types.
- Designed a "Cinematic Dark" aesthetic using Vanilla CSS and custom properties, focusing on a premium UI with high-contrast glowing accents.

OAU Law Reports (OALR) | Full-Stack Engineering

URL: <https://oaulawreports.vercel.app>

- Spearheaded the development of the official digital legal repository for the Faculty of Law, Obafemi Awolowo University.
- Architected the frontend using Next.js 14 (App Router) and TypeScript to handle high-traffic academic research and legal archiving.
- Designed a Light Theme academic aesthetic with Tailwind CSS, prioritising clean typography and readability for complex legal documents.
- Implemented smooth, non-intrusive UI transitions using Framer Motion to enhance user engagement without sacrificing performance.

Trade Journal | Full-Stack Development & Data Analysis

URL: <https://trade-journal-sigma.vercel.app/>

- Architected a comprehensive trading performance tracker using React, Node.js, and MongoDB to help traders maintain data-driven discipline.

- Developed a detailed trade logging system that manages position sizing, leverage, and precise entry/exit point calculations.
 - Engineered an interactive Performance Dashboard utilizing Chart.js to visualize equity curves, win rates, and P&L metrics in real-time.
 - Implemented secure authentication workflows using JWT and Firebase Auth to protect sensitive financial data across multiple user accounts.
 - Designed a refined user interface with Tailwind CSS that includes advanced filtering by strategy and integrated psychology logging for qualitative analysis.
-

TECHNICAL SKILLS

Software Architecture & Frontend

- **Core Frameworks:** React 18, Next.js 14 (App Router), TypeScript, JavaScript (ES6+).
- **Build Tools:** Vite, Vercel, Git, GitHub Actions, Web Performance Optimization.

Engineering & Creative Development

- **Immersive UI:** Framer Motion, Canvas API, Scroll-driven Animations, Gesture Logic.
- **Styling:** Tailwind CSS, Vanilla CSS (CSS Grid/Flexbox), Responsive Design.
- **Game Engineering:** Recursive Algorithms, Multi-input Interaction Systems (Drag/Swipe/Click).

Systems & Backend Infrastructure

- **Backend:** Node.js, Supabase, Firebase.
- **Databases:** MongoDB, PostgreSQL (Basics), Database Schema Design.

Design & Brand Strategy

- **Product Design:** UI/UX Design, Figma, Penpot, Wireframing, Prototyping.
 - **Visual Assets:** Inkscape, Canva, Brand Identity, Typography & Layout Design.
 - **Emerging Tech:** Gemini API Integration, Prompt Engineering.
-
